## **COVID-19 RESPONSE**

Cleaning Angels take COVID-19 (Coronavirus) seriously and are following the direction of the Provincial Health Ministry to deal with the COVID-19 situation in British Columbia.

As essential workers, our top priority is the health, safety, and well-being of our employees and customers. We are focusing on maintaining a safe work environment while providing a top-quality cleaning and disinfection service. We agree with the health experts' direction to exercise an abundance of caution in dealing with this virus, so that we can curb its spread in our community.

Therefore, some measures are being taken:

- Cleaning Angels offers its employees all PPEs needed for safe procedures, as disposable gloves, masks, and hand sanitizer;
- Cleaning Angels' employees are trained to sanitize their hands before and after using the washroom, lunch breaks, when entering or leaving a worksite, and after sneezing or coughing;
- Cleaning Angels' employees are advised to use their masks while inside buildings when by themselves. However, it is now mandatory to use a mask when sharing a room or a public space with other people;
- Whenever possible, Cleaning Angels' employees should keep at least 2m/6ft apart from each other and other people on worksites;
- Cleaning Angels developed policies to support and ensure employees presenting flu-like symptoms to stay at home and get tested, in order to contain the spread of the virus and protect other employees and customers;
- Cleaning Angels developed a sanitization protocol to ensure that all high-contact surfaces are properly clean and disinfected.

We understand that these are difficult times for every person and every business. While this situation continues, we believe that we all should keep our hope alive and do our best to ensure the health and well-being of the whole community.
